Summary

A cloud devops engineer proficient in developing and maintaining cloud infrastructure using AWS and GCP. Skilled in automating deployment and testing processes using tools such as Ansible, Terraform and Jenkins. Strong understanding of agile methodologies and a passion for continuous improvement. Seeking a role where I can utilize my skills and knowledge to contribute to the success of a team and company.

Experience

Cloud Engineering Intern

AltSchool Africa

Apr 2022 - Present (10 months)

- Configured and hosted a static website using an AWS S3 bucket; attached IAM policies to said bucket to limit access to only authorised audience; enhanced the site's content delivery through AWS's Content Distribution Network service and CloudFront
- Deployed Laravel Application integrated with MySQL on EC2 instance using Ansible
- Deployed static webpage using NGINX on AWS EC2 instance

Full-stack Developer Intern

Zuri Team, Inc.

Feb 2022 - Jul 2022 (6 months)

- Designed, automated and implemented a secure three-tier application on AWS EC2 instances using Terraform
- Developed web-browser using VueJS and jQuery
- Built an application backend server with PHP, ASP and Python

Education

Moshhood Abiola Polytechnic

Higher National Diploma, Mass Communication/Media Studies

Dec 2019 - Dec 2021

Licenses & Certifications

AWS Cloud Practitioner Essentials - AWS Training Online
